PROCEDURES AT OCEAN WAVE MEDICAL

MINOR SURGICAL PROCEDURES CRYOTHERAPY - EAR SYRINGING - VENESECTION IMPLANON INSERTION & REMOVAL MIRENA & IUD INSERTION & REMOVAL

At Ocean Wave Medical we have a comprehensive treatment room and a Private Procedure room with full nursing support. This enables a variety of services to be offered.

Minor Procedures - Minor Procedures are part of our service and our doctors will advise on the best way of removing skin lesions whether they are skin cancers, pre-cancerous or just troublesome lesions.

Cryotherapy - Some removals may involve a small procedure or others may only require cryotherapy.

Ear Syringing – Our Nurses are all trained in the safe procedure of ear irrigation. Book with your Doctor to have your ear health checked.

Implanon Insertion & Removal – A number of our Doctors are qualified in Implanon insertion.

Mirena & IUD Insertion & Removal – Dr Alison Roper is qualified in all areas of Mirena & IUD insertion and removal. A full check needs to be done with Dr Roper prior to booking in for Mirena insertion to ensure you are suitable to have this procedure done.

Haemochromatosis and Venesections - Our practice offers a Therapeutic Venesection Program for individuals who have iron overload as a result of hereditary haemochromatosis. Bookings can be made with Dr Jonathan Jing, Dr Geoffrey Broad, Dr Tony Moor & Dr Christelle Greeff for this service.

Any major surgery will be referred to one of our specialists.
